Acivico GROUP

ACIVICO'S BUILDING SAFETY ADVISORY SERVICE

BUILDING SAFETY ADVISORY SERVICE

Our Building Safety Advisory service has been developed to assist Designers and Contractors working on complex and high-risk buildings to provide assessment and assistance in the preparation of schemes which not only meet the client's needs but also comply with Building Regulations.

Using our expertise in technical standards, our large number of expert staff registered as Specialist Building Inspectors, and our knowledge of Birmingham and the surrounding area we are able to assist in the selection and use of appropriate guidance and provide options to demonstrate compliance.
