

# ENVIRONMENTAL POLICY STATEMENT

**Acivico is a multi-disciplinary consultancy company which offers clients across the private and public sector, a range of services including, Design, Project Management, Cost Management and Hard Facilities Management across the built environment sectors.**

Our vision and values represent our civic background and incorporate the need for delivering our services in line with our environmental and sustainability objectives to meet the requirements of BS EN ISO14001:2015

**Acivico is committed to continuously reviewing and reducing the impact of its activities on the environment.**

## We will:

- Seek to maintain, audit, review and continually improve an Environmental Management System to meet the requirements of BS EN ISO14001:2015.
- Review Systems and processes in response to operational or legislative changes.
- Set objectives and targets to continually improve our environmental performance that will be routinely monitored and reviewed to evaluate the effectiveness of this Environmental Policy.
- Environmental performance will be regularly and openly communicated against these criteria.
- Aim to carry out our business activities with respect and care for the environment, our neighbours and build good relationships with local communities.
- Plan and manage our environmental impacts and actively seek to develop opportunities to positively protect and enhance the environment.
- Practice good housekeeping.
- Maintain and raise environmental awareness throughout the company through mandatory training.
- Aim to reduce our greenhouse gas emissions in order to mitigate climate change.
- Aim to encourage environmental best practice through advice given.

### Supply Chain

We shall, where possible, endeavour to source materials, from responsible suppliers with an emphasis on recycled, recyclable or sustainable products and ensure our supply chain partners are delivering their commitments in line with their environmental policies.

### Environmental Awareness

We are committed to including Environmental Awareness training is undertaken as part of our mandatory training modules for all employees, which will include the communication of this environmental policy.

### Customers and Clients

We shall engage our clients during project development phases to encourage the inclusion of technology that will reduce the impact on the environment.

### Energy

We shall look to monitor, manage and reduce our use of energy and to evaluate alternative renewable energy technologies for implementation where they may be practicable in the works that we are responsible for.

### Pollution Control

We shall establish and maintain systems to avoid and prevent pollution of the environment and harm to human health.

### Waste Management

We shall ensure responsible management of our own wastes encouraging reduction, reuse and recycling to minimise disposal to landfill. We shall dispose of our wastes in strict compliance with legislation.

**Christopher Hall**  
Deputy Chief Executive and Director of Operations  
*Signed on behalf of Acivico*

*This Policy has been defined and endorsed at the highest level to ensure that it is appropriate to the nature, scale and environmental impact of Acivico's operations.*
