Fire Compartmentation Surveys

Ensuring Building Safety

Protect your building with independent Fire Compartmentation Surveys

Acivico Group provides comprehensive Fire Compartmentation Surveys to ensure your building's passive fire protection is effective and compliant, safeguarding lives and assets.

The importance of effective fire compartmentation

Fire compartmentation is a critical element of fire safety, designed to contain fires and prevent their spread. Your building's fire strategy divides the building into fire-resistant compartments, providing valuable time for evacuation, protecting structural integrity, and minimising property damage. Effective compartmentation is essential for compliance with fire safety regulations and protecting occupants.

Comprehensive Fire Compartmentation Surveys

Acivico Group offers thorough Fire Compartmentation Surveys, conducted by experienced and qualified fire safety professionals. Our surveys leverage electronic survey technology to streamline the inspection process and provide you with even more accurate and actionable insights.

Key features of our surveys:

Detailed Inspection: Meticulous examination of fire-rated walls, floors, service penetrations, and other compartmentation elements.

Comprehensive Reporting: Clear and concise reports with photographic evidence, highlighting areas of non-compliance and recommended actions.

Compliance Focus: Ensuring your building meets the requirements of the Regulatory Reform (Fire Safety) Order 2005, the Building Safety Act (2022).

Expert Advice and Action Plan: Practical guidance and support to remediate any identified issues and improve your building's fire safety.

Key areas covered in our surveys:

Fire-Rated Walls and Floors: Verifying the fire resistance and integrity of compartment walls and floors.

Service Penetrations: Inspecting and assessing the fire stopping around pipes, cables, and ducts passing through fire-rated elements.

Cavity Barriers: Checking the presence and effectiveness of cavity barriers in wall and roof cavities.

Glazing: Ensuring any glazing is fire-rated correctly.

Why choose Acivico?

Acivico Group brings experienced, highly qualified surveyors who deliver independent, impartial assessments tailored to your building. We identify and address compartmentation risks early, helping you stay compliant and in control.
